### **Product Name: RELINFORCE Surface Shield IV ZN**

Two component, anti-corrosive, zinc phosphate epoxy primer.

### **Description**

2 component anticorrosive low viscosity primer system having better handling properties, together with extended overcoat ability, make this an excellent primer for factory as well as site application prior to full system application. Epoxy zinc phosphate primer provides good abrasion resistance which minimizes mechanical damage in transit between the factory and site.

### **Application Areas**

- Highly anti-corrosive coating in the offshore, ship building, pipe-coating and protecting, petrochemical, chemical, pulp and paper, and bridge industries.
- Industrial maintenance primer

#### **Features & Benefits**

- Low VOC
- Lead-free pigmentation
- Excellent toughness and exterior durability.
- Superior water and chemical resistance.
- Long term protection against corrosion.
- Excellent adhesion to a variety of substrates can be sprayed, brushed or rolled.

### **Material Properties**

|  |            | Part A  | Part B | Mix                                     |           | Mixed     |
|--|------------|---------|--------|---|-----------|-----------|
| Feel   |            | Liquid  | Liquid | Liquid                                  |           |           |
| Color  |            |         |        | Buff / Red                              |           |           |
| Mixing Ratio   |            | 100     | 25     | -                                       |           |           |
| Working Life   |            |         |        | 40 - 50 minutes                         |           |           |
| Bond Strength  |            |         |        | > 1.5 MPa                               |           |           |
| Solid Content  |            |         |        | ≥ 60%                                   |           |           |
| Application Thickness                                |            |         |        | 50-75 microns (2-3 mils) dry equivalent |           |           |
|  |            |         |        | to 79-119 microns (3.2-4.8 mils) wet    |           |           |
| Drying Time  |            |         |        |   |           |           |
| Temperature  | Touch dry  |         |        | Hard Dry                                |           | Full Cure |
| 25°C   | 1 hour     |         |        | 4 hours                                 |           | 7 days    |
| 40°C   | 45 minutes |         |        | 3 hours                                 |           | 7 days    |
| Overcoating interval with recommended time intervals |            |         |        |   |           |           |
| Temperature  |            | Minimum |        |   | Maximum   |           |
| 25°C   |            | 5 hours |        |   | 12 months |           |
| 40°C   |            | 4 hours |        |   | 12 months |           |

Note: Ambient Temperature will affect the working life of the Product & is inversely related.

### **Surface Preparation**

- Surface to be clean of Oil, Grease, dust & any other material which will affect the adhesion.
- Appropriate Methodology to be adopted to achieve sound substrate for application of product.
- Apply the mix material over the substrate using appropriate means to cover the surface entirely to ensure proper bonding of the overlay system.

### **Packaging Size**

Part A: 4.0 KgPart B: 1.0 Kg

#### **Shelf Life**

Part A: 12 MonthsPart B: 12 Months

## **Storage Condition**

- Material to be stored in cool dry place
- To be kept in shade with no direct sunlight

### **Health & Safety Hazard Condition**

Please refer to MSDS for detailed information on the health & safety hazard while using the product.
